5,000 1 year, beds, 4-6 inch -----	7.00	60.00

HARDINESS OF CEDAR OF LEBANON—Perhaps because the Deodar Cedar is not hardy in the North, an error prevails that Cedrus Libani is also not hardy, which is a serious mistake. So far as concerns the nurserymen of Pennsylvania it is classed as a hardy evergreen without any hesitation. Even in the colder portions of the state it is said to thrive when not in solitary, exposed places, while in the Eastern portion it takes its place with the general run of hardy evergreens without any hesitation. At Philadelphia there are large cone bearing trees of its, and these trees are on elevated positions.

Writers say of the Cedar of Lebanon that all that now remains of them in a wild condition consists of a little forest of some four hundred trees, which are rigidly preserved. They lie on a small fertile plateau, situated at an altitude of six thousand and one hundred and twenty-three feet above sea-level. With the exception of a few stragglers, the grove is enclosed by a neat stone wall built by a former governor of Lebanon to protect the smaller trees from goats.—From Florist Review, 12-6-23.

 Cupressus Sempervirens (Italian Cypress)			
25,000 1 year, beds, 4-6 inch -----	4.00	35.00	
4,000 1 year, 2-4 inch -----	3.00	25.00	
SOUTHERN NURSERYMAN—Do not fail to plant Italian and Lawson Cypress this year. If they were hardy in the north the northern nurserymen would plant them by the thousands. The south is beginning to demand better, higher grade ornamentals. Grow them and you will find a ready market, right at your door.			
 Euonymus Bungeanus (Winterberry Euonymus)			
1,000 2 year, beds, 4-6 inch -----	5.00	40.00	
The above stock has been sold and identified among the trade as Euonymus Sieboldiana.
